## **DETAILED ACTION**

### ***Response to Arguments***

1. Applicant's arguments filed 01/19/2005 have been fully considered but they are not persuasive. According to the description (the same paragraph 64 cited by the applicant), in the current application a mobile station does not comprise both – a computing device and a medical device. On the contrary: it comprises one or another device. Hence, the resent amendment adds a new matter to the claims. Examiner directs applicant's attention to the fact that while a medical mobile unit comprising a tiltable computer docking station is probably patentable, a tiltable display screen is definitely not. Most of computers (laptops or desktops) displays are tiltable.

### ***Claim Rejections - 35 USC § 112***

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 22 and 23-24, 46-49 , 58-59 and 61-62 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. According to the description a mobile station does not comprise both – a computing device and a medical device. On the contrary: it comprises one or another device. Regarding to the claims 61 and 62: According to the description the power unit is self monitored

Art Unit: 2835

(paragraphs 61, 92, 136). There is no any description of how the power unit is monitored by the computing device.

***Allowable Subject Matter***

4. Claims 50-57, 60 are allowed.

***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Phoon et al (US Patent 6,339,732) and Curtis et al (US Patent 5,536,084) both teach a mobile medical computer workstation comprising a medical device and a computer device with a tiltable display screen.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
